

Silver is a valuable investment metal and at the same time industrial metal

Silver is closely linked to the gold price. At the same time, it enables portfolio exposure.

Silver in the investment portfolio provides diversification that can reduce overall risk. Therefore, investors should not overlook silver. Even though gold and silver often trend in the same direction, there is a big difference. Silver is more than half demanded by industry. As a result, silver tends to be more sensitive to global industrial activity, according to the Silver Institute. This also increases silver's volatility. The Silver Institute compared silver's historical performance with a number of traditional asset classes, from the beginning of 1999 through June 2022, and roughly speaking, it found that silver has a relatively low correlation with assets. This suggests that silver has valuable diversification potential. For this purpose, the Silver Institute performed portfolio optimization simulations.

The outlook for the global economy over the next ten years is fraught with uncertainty. According to the analysis for this period, everything points to a medium risk in a silver investment. Silver has earned a place in the investor portfolio; it is a cheaper alternative than gold and it can benefit from its inherent characteristics. Like gold, the precious metal is a store of value, but gold only accounts for about eight percent of industrial processing. Silver, which is important in the industry, will benefit from its use in various green energy applications, including electric vehicles, and will add value to a well-diversified portfolio. Discovery Silver or MAG Silver might come to mind here.

MAG Silver - <https://www.youtube.com/watch?v=IrelPMultfk> -, together with its partner Fresnillo, is taking care of the Juanicipio project in Mexico. In July, more than one million ounces of silver were produced and sold.

Also in Mexico is **Discovery Silver's** - <https://www.youtube.com/watch?v=MgDgfmsT5UU> - Codero Silver Project (silver, zinc and lead). The results of the pre-feasibility study are extremely positive.

Current corporate information and press releases from Discovery Silver (- <https://www.resource-capital.ch/en/companies/discovery-silver-corp/> -) and MAG Silver (- <https://www.resource-capital.ch/en/companies/mag-silver-corp/> -).
