

## British Columbia stands for gold

One of the best mining areas in the world is the Golden Triangle in British Columbia.

The area and the gold companies located there deserve a closer look. To date, significantly less than one percent of the prolific Golden Triangle has been mined. There seem to be new discoveries just waiting to be unearthed. In the Golden Triangle, which hosts one of the largest and richest metal deposits on earth, the first major gold discovery was made in the early 19th century. The area is about the size of Portugal and there is gold, silver, copper, zinc, nickel, jade and obsidian. It is still predicted that deposits worth hundreds of billions of dollars will be discovered. One of the reasons is receding glaciers, which bring inaccessible deposits to light. And it is the unique geology (porphyry and porphyry-like gold deposits and volcanogenic massive sulfides) that provides the metal wealth.

The first gold mine was started in the Golden Triangle area in 1918. It was considered one of the largest silver and gold mines in the world at the time and was closed in 1952. This former mine is now part of the Premier Gold Project, which covers more than 8,000 hectares. The Snip mine, discovered in 1964, also produced around one million ounces of gold with the enormous average grade of 27.5 grams of gold per ton of rock.

Today, **Skeena Resources** - [https://www.youtube.com/watch?v=pdD\\_ckWsCac](https://www.youtube.com/watch?v=pdD_ckWsCac) - holds a 100 percent interest in the mine. In addition, Skeena Resources is exploring and developing the formerly producing Eskay Creek Mine. This produced around 3.3 million ounces of gold and 160 million ounces of silver from 1994 to 2008.

Another company operating in the Golden Triangle is **Tudor Gold** - [https://www.youtube.com/watch?v=pRG-xDdJ\\_z0](https://www.youtube.com/watch?v=pRG-xDdJ_z0) -. Its Treaty Creek project covers almost 18,000 hectares and gold was also successfully produced there in the past. The current drill results are extremely promising. There is gold, silver and copper there.

Current corporate information and press releases from Skeena Resources (- <https://www.resource-capital.ch/en/companies/skeena-resources-ltd/> -).
