

## Gold and silver are always a good option

For thousands of years, the two precious metals have been important for the economy, culture and now also technology and have lasting value.

Silver in its function as an industrial metal is an important component of technological developments. This applies to renewable energies, state-of-the-art technologies and many other applications. Gold has the potential to preserve value and increase wealth. Silver also stands for security and value retention and there is a great deal of research into innovations using the special properties of the precious metal. For example, new and improved alloys are constantly being developed. The addition of silver to certain alloys can make the material stronger, whereby small amounts of nano silver are sufficient. Adding two percent nano silver to Metal Matrix (an important alloy in industrial production) can increase compressive strength by around 26 percent.

It is well known that gold holds a special fascination for investors. In the past, gold was used in coins, relics and jewelry. Today, it can be found in electronic components and in medicine. It can be found in cars, smartphones and digital communication hardware. Gold can also improve alloys, making them harder and more resilient. Environmental influences can hardly harm gold. The demand for gold is greater than the quantity produced by the mines. Reprocessing and central bank sales compensate for this. For many years, global demand for gold has always exceeded 4,000 tons per year (around 4,741 tons in 2022), with the exception of 2020. Companies with gold and silver in their mining projects are suitable for investors who do not wish to acquire precious metals physically (or even additionally).

These include **Sierra Madre Gold and Silver** - <https://www.commodity-tv.com/ondemand/companies/profil/sierra-madre-gold-silver/> - with three projects in Mexico. The La Guitarra mine is to be revitalized.

**Chesapeake Gold** - <https://www.commodity-tv.com/ondemand/companies/profil/chesapeake-gold-corp/> - focuses on the discovery, acquisition and development of gold-silver deposits in North and South America. The company owns the prospective Metates Project in Durango. It is one of the largest undeveloped gold and silver deposits in the world.

Current company information and press releases from Sierra Madre Gold and Silver (- <https://www.resource-capital.ch/en/companies/sierra-madre-gold-and-silver-ltd/> -).
