

## The flying cars are coming

There are already companies for electric vehicles that do not limit themselves to the road, but also include airspace.

For example, the Chinese XPeng Motors announced to invest 500 million US dollars in a company (HT Aero) that develops flying cars. A prototype already exists. The "X2" was on display at a Chinese air show in September. The "H2" operates fully electric, taking off and landing vertically. The charging technology comes from XPeng Motors. There is overlap with autonomous driving technology integrated into the terrain and also on the road. The average operator of a flying car will need some help operating it, unless pilot training is available.

Tesla boss Elon Musk also seems to be flirting with the construction of flying cars, but unfortunately no further details are known. It would hardly be surprising if flying cars were added to the plans to conquer Mars and revolutionise the energy market. But there is also competition. Already in 2019, a collaboration between VW subsidiary Porsche and Boeing emerged. The first news should come in 2025. In Slovakia, the "Aircar 1" took off this year. Although this model is still in the development phase, it covered 75 kilometers in 35 minutes from Nitra Airport to Bratislava Airport, up to 190 kilometers per hour fast and 2,500 meters above the ground.

For these new technologies and inventions to become reality, battery raw materials, among others, are in demand. These include nickel and cobalt.

These raw materials are owned by **Canada Nickel Company** - <https://www.youtube.com/watch?v=khS4jifS3eg> - at its flagship Crawford project in Ontario.

Also holding cobalt (and also gold) in the ground is **Mawson Gold** - <https://www.youtube.com/watch?v=L1jwfkYSxvl> -. Its gold-cobalt project is located in Finland.

Current corporate information and press releases from Mawson Gold (- <https://www.resource-capital.ch/en/companies/mawson-gold-ltd/> -) and Canada Nickel Company (- <https://www.resource-capital.ch/en/companies/canada-nickel-company-inc/> -).
