

## Gold as protection against inflation and loss of value

Gold and silver are good for investors who do not want to rely on a digital euro.

Whether or when the digital euro will come is uncertain, but work is underway. The ECB Governing Council is currently in the preparatory phase. This began on November 1, 2023, and is expected to last two years. It will then decide whether to continue preparations to introduce a digital euro. A digital euro could be used like cash; it would be a new means of payment, not a new currency. Euroland is not alone with these plans; around 93 percent of global central banks are said to have similar projects. If the digital euro becomes a reality, critics say there is a threat of cash being abolished. Many also fear for data security. After all, cash is anonymous, it works without a smartphone and without electricity.

That's where gold and silver come in. Everyone wants to preserve their wealth, or at best increase it. A look at the past shows that anyone who invests part of their assets in precious metals is on the safe side. If you want to avoid the issue of storing precious metals, you can familiarize yourself with the stocks of companies that hold gold or silver in their projects, are located in safe jurisdictions, are financially well positioned and have experienced management. These include GoldMining and Skeena Resources, for example.

**GoldMining** - <https://www.commodity-tv.com/ondemand/companies/profil/goldmining-inc/> - not only has a large portfolio of gold and gold-copper properties in the USA and a uranium project, but also shareholdings in Gold Royalty, U.S. GoldMining and NevGold.

**Skeena Resources** - <https://www.commodity-tv.com/ondemand/companies/profil/skeena-resources-ltd/> - is working hard to revitalize the Eskay Creek and Snip gold projects in British Columbia. A final positive feasibility study has been completed.

Current company information and press releases from GoldMining (- <https://www.resource-capital.ch/en/companies/goldmining-inc/> -) and Skeena Resources (- <https://www.resource-capital.ch/en/companies/skeena-resources-ltd/> -).
